

112-1 Advanced Cell Biology-2**Class Time:** 3:10 ~ 6:00 PM, Tuesdays**Language:** English**Credits:** 3 hours**Classroom:** Rm 208 at NCKU Medical College**Coordinator:** Prof Li-Wha Wu (Ext. 3618)

Goals: Familiarize students with cell biology fundamentals and application of this knowledge in addressing both basic and clinical research questions. By the end of the course, students would know the basics of fundamental cell biology and how to apply what they learn in addressing cell biology-related questions arising in the field of their research interests, including cancer biology, immunology, neurobiology, microbial pathology, and developmental biology.

Format: Divided into 2 parts: 1st on the fundamentals of cell biology and contemporary cell biology technology, and 2nd on the applied knowledge in cell differentiation, organogenesis, embryonic development, immunity, pathogen and host interaction, neurosciences and cancer. Each lecture will be presented by the instructors with their expertise in the field. Problem-based assignment(s) may be given before or after the lecture via Moodle.

Materials: Molecular Biology of the Cell by Alberts B et al (recent editions) and the relevant published materials given by each lecture
